

SWAROOP REDDY VUDUMULA

Engineering Leader | Director of Technology

Hyderabad, India • [+91 63010 61108](tel:+916301061108) • swaroop.vudumula@gmail.com • [linkedin.com/in/swaroop-reddy-vudumula](https://www.linkedin.com/in/swaroop-reddy-vudumula)

SUMMARY

Strategic Technology Leader & Architect with 11+ years of experience leading engineering organizations (40+ engineers) and building high-throughput SaaS, real-time analytics, and enterprise platforms across healthcare, industrial, and fintech domains. Specialized in distributed cloud architecture, micro-frontends, MLOps/AI integration, and scaling digital transformation initiatives that deliver measurable business impact.

CORE COMPETENCIES

Leadership & Strategy: Technology Roadmap, Engineering Management (40+ Engineers), Agile/Scrum Transformation, Cross-Functional Alignment

Architecture & Frontend: Micro-Frontends, React.jsTypeScript, Redux, Systems Design, Performance Optimization

Backend & Cloud: Node.js, Python, REST APIs, Distributed Systems, Microservices, AWS, Azure, Docker, CI/CD

Data & AI/ML: Event Streaming, MLOps (MLflow), Vector Search, Anomaly Detection, SQL/NoSQL, Data Pipelines

PROFESSIONAL EXPERIENCE

Director of Technology | ANKAR Engineers and Fabrications | Hyderabad, India (Apr 2023 – Present)

Owned end-to-end technology strategy and execution for digital transformation of manufacturing operations, leading an organization of 40 engineers.

Modernized legacy workflows into real-time, event-driven data systems, resulting in a 50%–90% reduction in production downtime.

Automated ~60% of manual production and reporting processes, significantly reducing human intervention and operational latency.

Built real-time analytics dashboards and scalable data pipelines to accelerate KPI-driven decision-making business units.

Introduced AI-driven anomaly detection and trend analysis models for proactive issue identification and high-availability operations.

Lead Full-Stack Developer | Safeway | San Ramon, CA, USA (May 2022 – Mar 2023)

Architected a high-availability healthcare and retail analytics platform handling millions of patient and pharmaceutical records with 99.9% uptime.

Drove system design decisions using React, Node.js, and real-time data processing pipelines to optimize data flows and reporting speed.

Led an engineering sub-team and collaborated closely with data science teams to integrate predictive analytics models into production clinical workflows.

Optimized API performance and database queries, substantially reducing load times and system overhead.

Lead Software Engineer | CDK Global | Seattle, WA, USA (Mar 2019 – Jun 2022)

Spearheaded micro-frontend architecture powering enterprise platforms utilized by millions of active enterprise users, achieving a 30% reduction in page load times.

Drove design decisions for reusable component systems that improved developer velocity by 50% and accelerated time-to-market.

Designed and implemented robust CI/CD pipelines and Azure cloud deployments, increasing release frequency and system reliability.

Contributed to scalable distributed system design supporting high-volume user interactions and complex enterprise workflows.

Senior Software Engineer | Bio-Rad Laboratories | Hercules, CA, USA (Jan 2017 – Feb 2019)

Developed enterprise applications for healthcare and laboratory analytics platforms.

Built high-performance data visualization modules supporting critical diagnostic workflows and scientific research.

Improved performance and responsiveness of complex dashboards handling large-scale scientific datasets.

Software Engineer

Avenir IT Private Limited | Hyderabad, India | June 2014 – July 2015

Developed W3C-compliant, accessible enterprise web applications using HTML, CSS, JavaScript, and jQuery.

Created UML architecture diagrams (Use Case, Class, Sequence) object-oriented system design and documentation.

EDUCATION & CERTIFICATIONS

• **MS in Computer Science** | San Francisco Bay University, CA, USA (2015 – 2016)

• **BS in Computer Science** | GITAM University, India (2010 – 2014)
